SUMMARY

Multilingual Software Engineering professional with 6+ years of experience in technology, CRM/MarTech, and international environments, combining API-driven data pipelines, business logic, and marketing technology to support global communications and analytical solutions. Building on this foundation, I have expanded into Data Analytics, Business Intelligence, and Reporting, applying my technical background to end-to-end analytical solutions involving data preparation, modeling, visualization, validation, and performance analysis, demonstrated through a technical portfolio of real-world BI and SQL projects. My background bridges software engineering, CRM/marketing technology, and data analytics, providing a differentiated understanding of how data moves across systems and transforms into meaningful business information. Professionally proficient in English, fluent in Portuguese, and native in Spanish.

EXPERIENCE

Email Developer

Encora (Coforge) | Alajuela, Costa Rica | Oct 2020 – Present

- Built data providers that extracted, transformed, and validated data from external APIs to deliver campaign-specific outputs, handling complex business logic such as date-range filtered datasets, functioning as production ETL pipelines.
- Designed and built reusable dynamic components consuming real-time API data to personalize email content for global marketing campaigns sent to thousands of users, significantly reducing manual effort in creation workflows.
- Led technical project coordination for high-visibility campaign deliveries, managing task assignments, status tracking, and requirements gathering across design, engineering, and PM teams.
- Documented complex technical processes and created step-by-step guides for international cross-functional teams, reducing onboarding time and streamlining campaign execution.
- Integrated and validated API-driven data supporting dynamic, personalized marketing communications across Braze and Marketo platforms for US and UK clients.

PROJECTS

LATAM GDP Performance & Economic Pipeline

Personal Project | Jan 2026 – Aug 2026 | gitlab.com/acastro97/automated-api-data-pipeline

- Built an end-to-end data pipeline extracting GDP growth and nominal GDP data from the World Bank REST API across 18 Latin American countries using Python (requests, pandas).
- Modeled data in SQL Server using a semantic view (vw_fact_gdp_latam) consolidating percentage and absolute values into a single analytical layer for Power BI.
- Developed DAX measures including RANKX with ALL() for accurate regional rankings independent of visual filter context, resolving filter context conflicts between card visuals and the full dataset.
- Designed two interactive Power BI dashboards: GDP growth treemap with conditional gradient formatting and nominal GDP horizontal bar chart with average regional benchmark line.

Gym Operations Analytics Database

Personal Project | Mar 2025 – Mar 2026 | ajcj97.github.io/projects/gym-admin

- Designed and normalized a relational database model supporting operational reporting for a simulated multi-branch gym with full ERD documentation.
- Performed complex SQL JOINs, CTEs, and aggregations across 5 related tables to generate automated monthly reports and identify revenue trends by service type.

Gym Admin Database BI Report

Personal Project | Feb 2026 – Mar 2026 | ajcj97.github.io/projects/gym-admin-report

- Integrated transactional SQL data into Power BI, creating a 3-page operational dashboard tracking 10+ core business KPIs with Key Insights, Business Interpretation, and Actionable Insight documented per visual.
- Built DAX measures for revenue totals, transaction counts and percentage splits, with office and year slicers to filter operational metrics by location and period.

Python Database Generator
Personal Project | Jan 2026 – Feb 2026 | ajcj97.github.io/projects/database-generator

- Developed a Python command-line tool generating synthetic user records of any size in CSV and JSON formats, with automated randomization, to create test data for SQL and BI projects.

CERTIFICATIONS

Microsoft / Coursera (2024)

- Modern Data Warehouse Analytics in Microsoft Azure
- Microsoft Azure SQL
- Explore Core Data Concepts in Microsoft Azure
- Microsoft Azure Cosmos DB

Microsoft Learn (2025)

- Introducción al análisis de datos de Microsoft (Introduction to Microsoft Data Analytics)
- Preparación de datos para el análisis con Power BI (Prepare Data for Analysis with Power BI)
- Preparar y visualizar datos con Microsoft Power BI (Prepare and Visualize Data with Microsoft Power BI)

Verifiable public transcript: learn.microsoft.com/en-us/users/albertocastrojimenez-0038/transcript

Other

- PL-300 Microsoft Power BI Data Analyst Associate — In Progress
- Gen AI Training Path Foundational & Technical — Encora / Coursera (2025)
- Storytelling With Data — Udemy (2023)
- Power BI Business Intelligence — G-Talent (2022)

EDUCATION

Bachelor's Degree in Software Engineering
Universidad Técnica Nacional (UTN) | 2021

Diploma in Information Technologies
Universidad Técnica Nacional (UTN) | 2020

SKILLS

Data & BI: SQL (PostgreSQL, MySQL, SQL Server), Power BI, DAX, Power Query, Dimensional Modeling, Star Schema, Dashboard Development, ETL Processes, Data Modeling, Data Quality & Validation

Programming & APIs: Python (Pandas, NumPy, Matplotlib, Seaborn), REST APIs, API Integration, Data Transformation

CRM & MarTech: Braze, Marketo, Marketing Automation, Dynamic Personalization, Apache Velocity

Tools & Methods: Git, GitLab, GitHub, Jira, Agile/Scrum, BigQuery (Basic), Advanced Excel

Languages: Spanish (Native), English (B2 Professional), Portuguese (Fluent)

CORE COMPETENCIES

Analytical Thinking & Data Interpretation, Critical Thinking & Problem-Solving, Data Quality Mindset & Root Cause Analysis, Technical & Business Requirements Translation, Cross-Functional & International Collaboration, Stakeholder Communication, Attention to Detail, Process Optimization, Adaptability & Learning Agility
